for Today's
Lifestyles*

 TRU-MOLD SHOES
INCORPORATED

ORTHOPEDIC SHOES and SOLUTIONS – CUSTOM DESIGNED

*The latest selection
of custom-molded shoes
in contemporary styles
for today's rigorous
lifestyle demands*

- Maximum comfort and flexibility are features of our new stretchable, breathable TRU-STRETCH fabric, perfect for hammertoes, bunions, edema and hypersensitivity
- Our new athletic lining, available as a standard or optional feature on some of our new shoes, is a soft, cushy fabric offering maximum comfort
- Located on the forefoot of some of our new shoes is an exclusive exterior mesh material, a slightly stretchable, highly durable woven fabric commonly found on today's most popular athletic footwear
- Our new shoes also feature our exclusive double orthotic system, eliminating weight-bearing on sensitive areas for maximum comfort
- All our shoes are manufactured using the latest CAD/CAM techniques – under direct pedorthic supervision – and complete technical, professional support throughout the dispensing process
